- 20mm round

## The Railloc Patented System

This superior system means a Railloc panel can be made very quickly with no need for unsightly welds on either side of the panel. No welding is required, which means both sides of the panel look identical. In fact a railloc panel is stronger than a welded panel, with none of the long term disadvantages of possible cracks or breaks occurring in welds. This “NO WELDED LOOK” is what Architects and Designers have been wanting but could never have until now. Enjoy the long term benefits of good design.

## Stainless Aluminium<sup>TM</sup>

The look of polished Stainless Steel at a fraction of the cost

Offers the same look of polished stainless steel but at a fraction of the cost. Stainless steel products are expensive to manufacture, as they require welding and polishing numerous times. These are all very costly and labour intensive processes. This is not the case with Stainless Aluminium<sup>TM</sup>.

## eurowood<sup>TM</sup>

*The stunning timber look finish that looks and feels exactly like natural timber.*

## sahara loc-coat<sup>TM</sup>

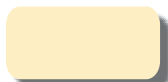

*textured, durable and scratch resistant powder coated finish*

**Black**

**Silver**

**Primrose**

Sahara Loc-Coat® powder-coating is a textured, super durable, scratch resistant finish. The Sahara Loc-Coat® range of powder coating was developed for a six star hotel in Dubai in the Middle East to withstand extreme climatic conditions.

Normal powder-coating would not stand the test of time in this beach location on The Gulf due to the extreme temperatures and high salinity. The Sahara Loc-Coat® finish is guaranteed world-wide by the manufacturer, and includes beach front locations\*, one of the harshest climates for powder-coating to endure.

There are 3 Sahara Loc-Coat® colours in the Railloc range. Just contact your local stockist for details.

\*Maintaining conditions apply.
