The Screenloc Patented System

This unique system enables a Screenloc Panel, for a gate, fence or patio to be made in 5 minutes, ready to install. No welding or rivets are required to make a Screenloc panel. In fact a Screenloc panel is stronger than a welded panel, with none of the long term disadvantages of possible cracks or breaks occurring in welds.

COULD THIS BE THE TOUGHEST POWDER-COATED ALUMINIUM IN THE WORLD?

Sahara Loc-Coat® powder-coating is a textured, durable and scratch resistant finish. The Sahara Loc-Coat® range of powder coating was developed for a six star hotel in Dubai in the Middle East to withstand extreme climatic conditions.

Normal powder-coating would not stand the test of time in this beach location on The Gulf due to the extreme temperatures and high salinity. Sahara Loc-Coat® is guaranteed by the manufacturer for 10 years including right on the beach*, one of the harshest climates for powder-coating to endure.

We offer the same guarantee World wide. There are 6 Sahara Loc-Coat® colours in the Screenloc range. Just contact your local stockist for details.
